

## Return On Investment (ROI)

**With ROI, decision makers compare the timing and magnitude of expected gains to investment costs. Glove Guard® products have withstood the test of time to provide three aspects of bottom line savings:**

- **Use of the Glove Guard® products reduce direct and indirect costs associated with hand injuries. If personal protective equipment is available, it will be used.**

*“Use of the Glove Guard® has enabled us to far surpass our initial expectations. It has become as common as hard hats and safety glasses. Recordable hand injuries have been reduced by as much as 86%. Thanks for your continued support and assistance in making our site safer and more cost efficient.”*

Exxon Polymers Group, Mont Belvieu Plastics Plant

- **Use of the Glove Guard® products reduces glove replacement cost, cost associated with environmental clean up and the patented break-away provides a level of reduced liability.**

*“In the last three months, about 80% of the glove replacement cost is due to lost or misplaced gloves, your product will help greatly reduce that number.”*

August 9, 2004, Darren Matthews, Unilever HPC

In the Houston Texas area, several General Contractors on major building sites require the Glove Guard® products for all contractors that work on the premises due to glove loss reduction between 40% to 95%. The strong grip of the product ensures that the items stay attached instead of just falling off—the redundant break-away takes care of the liability associated with an employee being pulled into machinery.

- **Use of the Glove Guard® products along with a company’s safety program incentive combines the dollars spent with a tool that will actually help accomplish the safety goals.**

Major companies are using the Glove Guard® products as safety incentives with their company logo, their safety program’s slogan or one of the Standard Safety Slogans to get the safety message across while providing a tool to accomplish the safety goal and reduce glove replacement costs.

**Ask for the Glove Guard®, Utility Guard™, & Utility Bag™ by name – they are the ONLY product with the patented break-away safety feature and a proven record!**
