

KewLid

Your Cooler Just Got Kewler!

What is the KewLid® cover?

The KewLid® cover is a support lid that is made to fit over the top of a 55-gallon drum or 44-gallon trash can to hold your beverage cooler in place while providing a trash receptacle and room for cups and single-serve drink mixes.

Who uses it?

The KewLid® cover is perfect for the petrochemical, refining, construction or any business that has workers outdoors. It is also ideal for sports teams, youth leagues, parks, golf courses and anywhere you find active people outdoors in need of hydration.

Why use it?

Proper hydration is vital for health and well-being and with the KewLid® cover your hydration station can be consolidated to a single space saving 'tower'. Also, since using the KewLid® cover provides a space for cups, single-serve drink mixes and a trash receptacle it can increase productivity!

Why tap water and not bottled?

Bottled water costs over 100 times as much as tap water per gallon and is no healthier or cleaner than tap water. In fact, bottled water isn't as tightly regulated as tap and can have more contaminants or bacteria. Bottles also create a huge environmental problem from both their production and disposal.
